

Dear friends and colleagues,

This Special Issue of ELIAMEP Times is dedicated to the 7th ELIAMEP European Seminar, held in Sounio, Greece (10-13 June 2010), on 'Economic Governance in the Eurozone and the EU: Drawing Lessons from the Crisis'. This year's seminar brought together a group of leading thinkers and policy-makers to draw lessons from the ways in which Europe has so far coped with the crisis and reflect on its broader political and social consequences. In this context, the adequacy of the Union's crisis management mechanisms and the role of individual member countries were examined, and alternative scenarios for economic governance were discussed. The highlight of the conference was the keynote speech delivered by the Greek Minister of Finance, Dr. George Papaconstantinou. The seminar was organized in cooperation with Bruegel and with the support of the Lifelong Learning Programme, Jean Monnet Actions, of the European Union (Education, Audiovisual & Culture Executive Agency).
